A globally inspired collection

The World's Fair Pack includes two new coasters, one new tracked ride, and adds 10 new themes based on a selection of countries; China, USA, France, Morocco, Italy, Germany, Japan, UK, Mexico, and Spain.

With it come cultural props, giant food signs, fences, path extras, character hats, and 10 new wall set styles based on the new country themes complete with shop panels, doors and roof pieces.

15 brand new music tracks from JJ Ipsen will give your park international flair. Hear music inspired by the diverse local flavour of the newly added countries. Alongside the new music, there will also be 16 new ambiences for the new regions and 25 new triggered sound effects.

A celebration of international engineering excellence

The World's Fair pack introduces two brand new coasters: Polarity and Jixxer & Interceptor.

Polarity, is an unmanned rapid transport system that uses magnetic forces to propel the train forward at great speed. This has a unique and flexible track system that aesthetically has a futuristic feel but is equally fitting in most parks.

Jixxer & Interceptor, is a duelling duo of launched motorcycle coasters (two separate coasters, same type of coaster). This is a type of high speed hydraulic launched track with riders leaning into the corners in a new seating type as they embark on a high octane motorcycle chase. Are you the good guys or the bad guys?

The soundtrack for *Immortal Redneck* is nothing truly special; it's functional and does its job. On the other hand, the gameplay and fun\addictive factor of *Immortal Redneck* as a whole is crazy great.

Hopefully the devs will continue with their roadmap and maybe even create new (paid) content in the future.. Large, Complex, fun layouts await you, in a solid stealthy heist game. The game was harder than I expected, and was a lot more challenging and rewarding, in a Hotline Miami\Hit man indie cross over. Making my way through the level stealthy only to be seen and then having to fall back on old faithful... Kill them all! 10\10 would fail and kill them all again!. Aside from being based on a frustrating puzzle game (called Fifteen, if I understand correctly), the animations are painfully slow, with absolutely no way to speed them up.. Not quite as good as Choice of Robots, but with a far grander finales that literally remake the game world. Worth the price.. Awsome lots of hours fun also lots of big boss fish

Do NOT buy this game. It is buggy as hell. I installed the game and the "background" of the game does not show. It's all white. I let the devs on the darkestvile castle forum on steam know, but still no reply.. The weapons are pretty good and they don't add a reticle in the middle of the screen which feels kind of like Killing Floor 2 and encourages you to actually use the sights.

Sigh... if only Game Guru had functional AI, a dialogue system, a quest system, and multiplayer functionality <:-(. Pros

Nice Map

Pretty

Cool zone starts

Cons

Maybe to big. Expecting a Summer Sale - Paradox Interactive increased base prices for most if not all their games.

Anything morally and ethically wrong with it?

Vote with your Money.. Nice change of pace, considering I always use Dart Monkey Specialty + Bigger Beacons Village and I'm rather bored of the older look.. Honest price~. What can I say? This is A MUST HAVE.. A nice, free mod. It's especially good for levelling for Rising Storm.. One of my favorite aspects of Mafia 2 is the story progression and how the map and atmosphere changes as you progress through different time periods. The map is done very well, and it feels real to what I assume what 1940's New York would feel like - But I wish the game gave you more opportunities to explore all the hidden corners. I have also encountered some bugs concerning the map with some area's glitching out to black but it has only happened 2-3 times.

It's fun to drive around the city while the radio plays in the background - especially when you're being chased by cops. I think the Police AI is actually pretty decent most of the time, and I like how you have the option to pay fines instead of just shooting the cops.

The campaign is enjoyable, though I can't say the same for the DLC missions. The campaign missions don't feel very repeatable and they're almost always set in different places or time of day. Like I mentioned before, the story progresses really well- and you can really feel and see the changes as you play.

I think if you're really interested and have a couple extra bucks, get it on sale.. I have read a few negative reviews and they do have some good points that never even occurred to me while I was playing. (I could be wrong if so I apologize) 'Near as I can tell the game lacks the ability to win by TKO or by Cuts so it's no Fight Night but the game is cheap and if you have a controller then it can be fun. In one of the negative reviews, a guy said that you have to grind your way to the top and I thought what game don't you have to do that in? You have to win matches earn money and train in the gym to become champion there are 3 belts in career mode the visuals are great but it lacks when it comes to the boxers faces and the cuts they really are lacking for a game that is titled REAL boxing. I find it to be an OK game but in my opinion you should always try a game and take reviews with a grain of salt since Steam has a 14 day 2 hour refund there is no harm in trying the game for yourself just don't play over 2 hours if you don't like it if you do then, at last, you have a time killer which is a bit enjoyable to play because who doesn't like a boxing game also remember to turn the blood on in the options. I am going to give it a thumbs up I wish there was a 3rd option for the question "Do you recommend this game". This is a try before you buy type of game.
